

This pattern is sized to print on standard size paper. When the three patterns are printed at 100% and pieced together, the piece will be approximately 10 " high and 20" wide. You can cut the pattern at this size but the pegs will be a little too close together to hold three caps. It would be better to enlarge the pattern to 120% before cutting. This would result in a pattern that is 12" by 24" (approx.) with the cap pegs being spaced at about 8 inches apart.
